Muhammad Fahim
Software Engineer – Full Stack Developer
Karachi, Pakistan

⦿ Summary

AI-first **Full-Stack Software Engineer** with **6+ years of experience** building intelligent, high-performance web applications using **JavaScript, PHP, React.js, Next.js, and WordPress**. Specializes in **AI-augmented frontend and backend development**, leveraging tools like **Cursor, Claude, and GitHub Copilot** for vibe coding, rapid prototyping, and automated workflows. Experienced in embedding AI capabilities directly into system architecture, integrating **REST APIs, cloud services, and CI/CD pipelines**, and transforming **wireframes and UI/UX designs** into polished, scalable interfaces through close collaboration with AI, backend, product, and cloud teams.

Core Skills

Front-End & UI Engineering: React.js, Next.js, JavaScript (ES6+), TypeScript, Redux, Zustand, HTML5, CSS3, Responsive Design, UI/UX Implementation, TailwindCSS, Bootstrap, Material UI, Ant Design, jQuery

Backend & Databases: PHP, Laravel, Symfony, Node.js, REST APIs, AJAX, JSON, MySQL, PostgreSQL, MongoDB

AI, Automation & Agentic Tooling: AI-augmented development using Cursor, Claude, GitHub Copilot, Tabnine; workflow automation with Voiceflow, ElevenLabs, Make (make.com), n8n, AI system orchestration, API-based automation, UI prototyping (Vercel v0, Locofy.ai, Kombai)

Cloud, DevOps & CI/CD: AWS, Azure, GCP, Firebase, Docker, Kubernetes, Cloud hosting, CI/CD pipelines, GitHub, GitLab, Bitbucket

Performance, Testing & Quality: Web performance optimization, cross-browser compatibility, Jest, React Testing Library, automated testing

Integrations & Platforms: Shopify, Magento, Salesforce, Google Auth (OAuth2), TikTok, Facebook, Instagram, microservices, third-party SDK integrations, GraphAPIs

Realtime & Streaming Systems: Amazon IVS, Socket.IO, Amazon Chat, Agora, Realtime messaging and live streaming architectures

💼 Employment History

Front-End Developer at Fascom Limited, Karachi
October 2021 — Present

At **Fascom Limited**, I lead **front-end development and AI system integration** for a large-scale **social commerce platform**, including **Agentzena, an AI-powered customer support agent**, delivering intelligent solutions across **eCommerce, live streaming, and automated customer engagement**.

Key Contributions:

- Led **front-end development** of scalable, high-performance applications using **React.js, TypeScript, and TailwindCSS**.

- Designed and integrated **AI agents and automation workflows**, collaborating with AI/ML teams to deliver intelligent customer support and system automation.

- Worked cross-functionally across **frontend, backend, platform, DevOps, and cloud teams** to deliver end-to-end features and reliable integrations.

- Built and integrated **REST APIs**, optimized deployment pipelines, and supported **CI/CD, cloud operations, and production monitoring**.

- Delivered **real-time and social commerce features**, including **Amazon IVS live streaming, chat systems, Agora A/V**, and integrations with **Facebook, TikTok, Salesforce, and Magento**.

Tech Stack & Tools:

- **Front-End & UI/UX:** React.js, Next.js, JavaScript (ES6+), TypeScript, Redux, Zustand, HTML5, CSS3, TailwindCSS, Bootstrap, Material UI, Ant Design, Responsive Design, UI/UX Implementation, jQuery

- **AI & Automation:** AI system orchestration, workflow automation (VoiceFlow, ElevenLabs, Make.com, n8n), AI copilots (Cursor, Tabnine, Claude, GitHub Copilot), UI prototyping (Vercel v0, Locofy.ai, Kombai), automated testing, API-based intelligent automation

- **Realtime & Streaming Systems:** Amazon IVS, Socket.IO, Amazon Chat, real-time collaboration and live interaction features

- **eCommerce & Platform Integrations:** Shopify, Magento, TikTok, Squarespace APIs, Salesforce, third-party SDK integrations

- **Backend & Data:** REST APIs, Webhooks, JSON, GraphQL, Firebase, database integration, server-side logic, cloud-native architectures

- **Collaboration & Project Management:** GitHub, GitLab, Bitbucket, Jira, Asana, ClickUp

- **Deployment & Cloud Platforms:** Vercel, Cloudflare, GitHub deployment, CI/CD pipelines, cloud hosting, monitoring, and automation.
